

# TRAINING GRANTS

SUPPORTED BY NINR

Are you a student, scientist, or professional with a nursing degree? Do you want to broaden your scientific background, extend your research capabilities, or change the direction of your career? At the National Institute of Nursing Research (NINR), we understand how additional training can advance your goals, and we have several opportunities for you!

- **Fellowships:** Through the Ruth L. Kirschstein National Research Service Awards (NRSA) program, NINR supports nurse scientist training that develops skills to conduct nursing research through individual and institutional predoctoral, postdoctoral, and senior fellowships. NINR supports the following NRSA mechanisms: F31, F32, F33, and T32.
- **Career Development Awards:** NINR provides career development research training opportunities for nurse scientist professionals in early career and faculty positions. NINR supports the K01, K23, K24, and K99/R00 Career Development Awards.
- **Developing Nurse Scientists Course:** NINR offers a free, online training course about grantsmanship. Learn more and register: [ninr.nih.gov/training/online-developing-nurse-scientists](http://ninr.nih.gov/training/online-developing-nurse-scientists)

## Contact:

**David Banks, PhD, MPH, RN**  
Program Director
